

Complete testing equipment for patrol inspection or even full inspection during the manufacturing process. Check product quality for customers and ensure that all products delivered to customers are safe and reliable.

Actual case

-  **High temperature**
-  **High power**
-  **Waterproof**

Working voltage: DC 1500V
Working temperature: -40~125°C
Waterproof rating: IP67

Air tightness testing machine

Withstand voltage testing machine

Terminal profile analysis tester

Temperature rise test machine

High voltage insulation test

Tensile testing machine

Various wire processing automation equipment to ensure the reliability of the process capability. Reduce the risk of undesirable human factors.

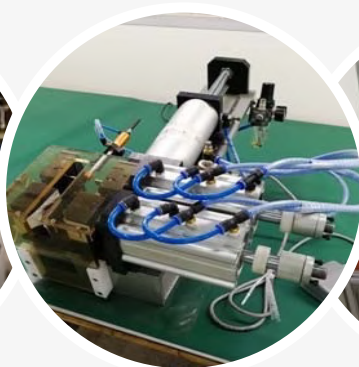

Automatic cutting machine

Shield braiding processor

Automatic wire stripping machine

Hydraulic riveting press
