

Our Services

Delivering excellence in electronic manufacturing with cutting-edge technology and proven expertise

OEM Services

Customized Manufacturing (OEM)

- *Product manufacturing based on customer requirements.*
- *Diverse material options and advanced processes to ensure quality and cost efficiency.*
- *Support for small-scale pilot runs and large-scale mass production.*
- *Technical Support & After-Sales Service*
- *Product Applications*
Consumer electronics, industrial control, medical devices, automotive electronics, communication products, etc.

Our Services

Delivering excellence in electronic manufacturing with cutting-edge technology and proven expertise

ODM Services

Product Design & Development (ODM)

- *Comprehensive product design solutions, including industrial design, structural design, and electronic circuit design.*
- *Support customers from concept to prototype development to accelerate time-to-market.*
- *Hardware-software integration and feature optimization support.*
- *Long-term maintenance and upgrade services to extend product lifecycle.*

Our Services

Delivering excellence in electronic manufacturing with cutting-edge technology and proven expertise

EMS Services

Electronic Manufacturing Services (EMS)

- *Professional technical consultation and troubleshooting.*
- *PCB assembly (SMT/DIP), testing, and inspection.*
- *Full system assembly, packaging, and logistics.*
- *Real-time monitoring of production progress to ensure work orders follow the schedule and improve efficiency.*
- *Comprehensive supply chain management to reduce customer overhead.*

EMS Service

- Requirement Review
 - Product Proposal
 - Project Schedule
 - Budget and Investment Analysis
 - DFMEA Report
 - Risk Assessment
 - Quality and Environmental Requirements Assessment
- EVT Review
 - Product Specification
 - DFX Report
 - Design Of Experiment
 - Functional Verification
 - Safety Testing
- DVT Review
 - Equipment, Tooling/Fixture Preparation
 - PFMEA Report
 - SIP/QC Plan
 - Reliability Testing
- PVT Review
 - Pilot Production
 - Material Approval
 - Data Compilation and Summary
 - Reliability Testing
- MP Review
 - 4M1E for Mass Production
 - Yield and Efficiency Improvement
 - Engineering Change Management
 - ORT Plan
